Come Visit DeWind One-Pass Trenching

October 11 - 13 @ Fairmont Banff Springs Hotel

Booth #: 26

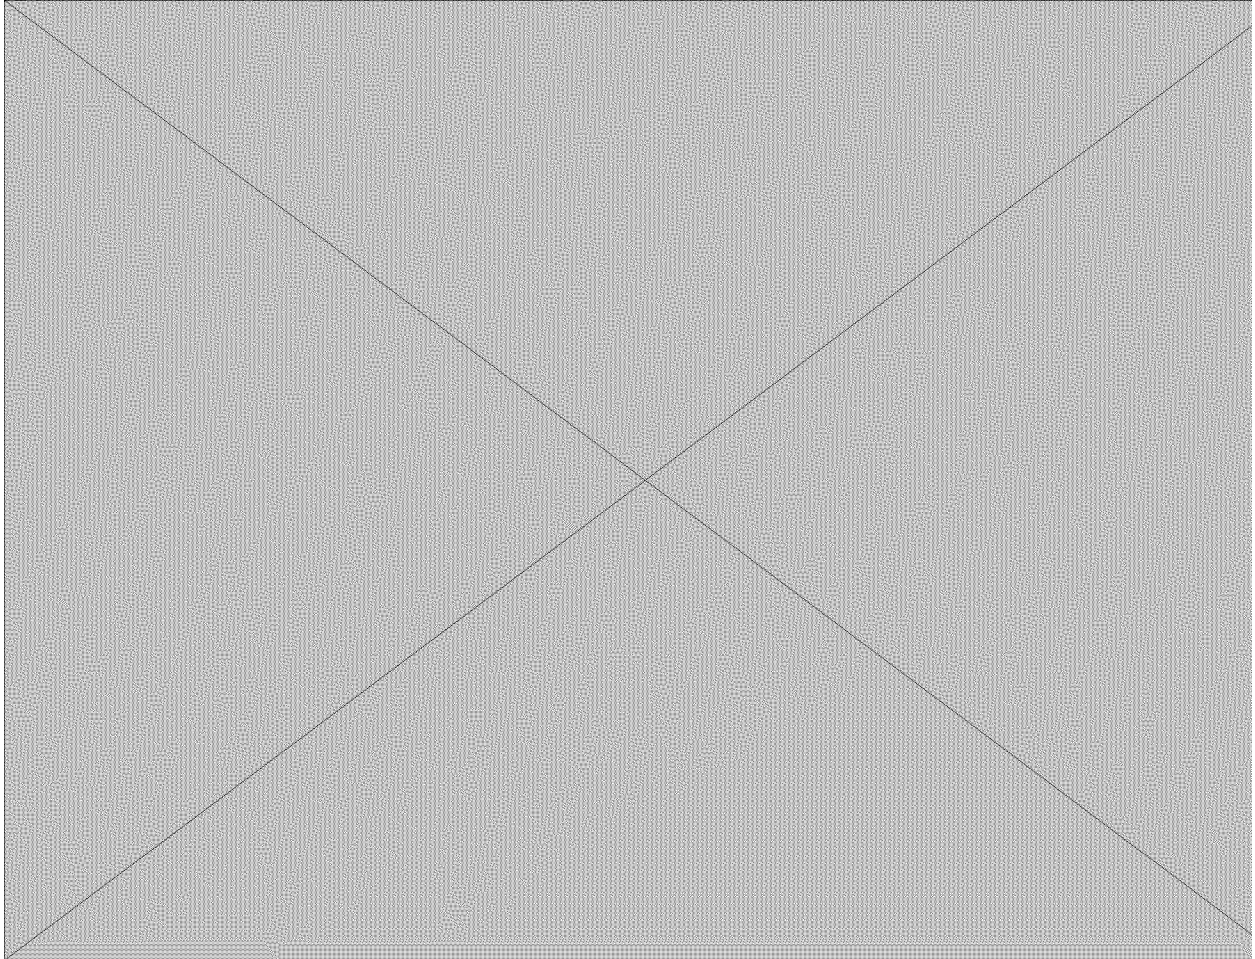

has been in the construction business for over 30 years, focused on engineering, building and operating the largest most capable One-Pass Trenchers in the world.

125 feet deep.

PRB Walls

50+

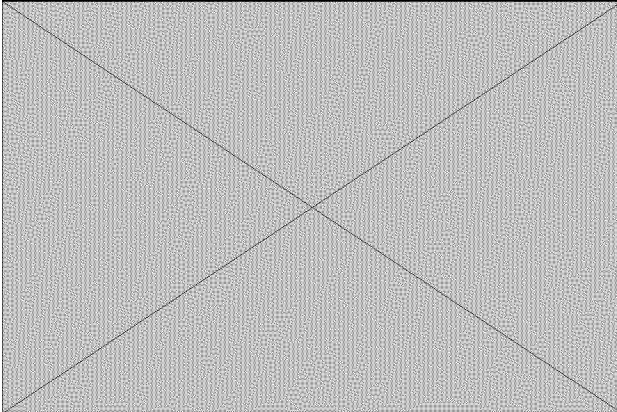

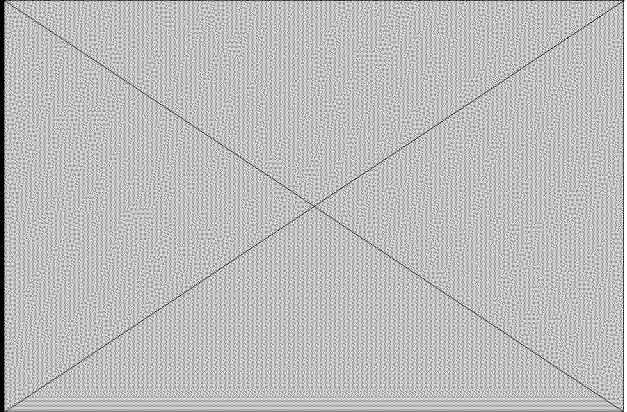

- Average of 200 - 400 feet installed per shift
- Native soils are removed as backfill is immediately placed
- Trencher can fit on narrow platform
- No open excavation

A solid black horizontal bar spanning the width of the page.

A smaller square with a light gray background and a fine grid pattern, identical in style to the larger square above. It also features two thin black diagonal lines crossing in the center to form an 'X' shape.

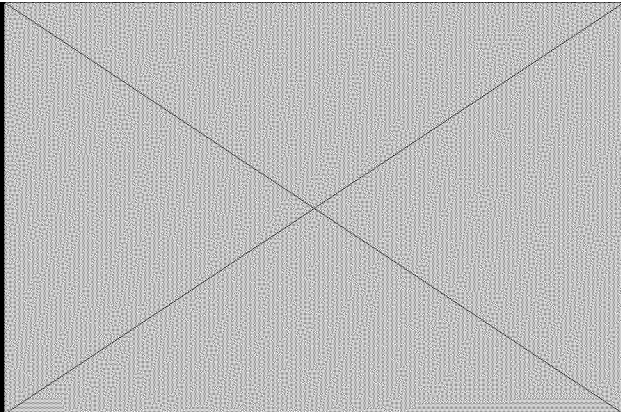

**Groundwater & Product
Recovery Systems
50+**
